Next cohort date: 4 April 2026

What is provided

Refreshments provided throughout the programme

Laptop and full access to AI tools during the workshop

Curated learning materials and resources

Exposure to real-world creative workflows used in studios

Meet our World Class Tutors from Lemon Sky Studios

Lead Rigging Artist and Educator - 10 years of experience in the animation + game industry

Anis has worked with leading studios on projects for **Disney, DreamWorks, Netflix, and Nickelodeon**, specializing in character rigging and technical animation.

Passionate about education, Anis enjoys helping young minds discover their creative potential. He has conducted workshops and training sessions that guide experienced artists and students in developing technical and creative skills.

His teaching approach focuses on making complex technology simple, fun, and empowering, encouraging students to explore their imagination and the future of digital creation.

Technical Artist/Python Developer - 10 years of experience in animation, VFX, and game production

Reza holds a Bachelor's degree in Computer Science and has professional training in software and web development. Today, he focuses on **Creative AI** workflows, exploring how **Technology** can support artists in generating visuals and ideas.

His work blends art, programming, and emerging AI technologies to build tools that generate images, animations, and visual effects.

In his classes, Reza introduces young learners to generative AI in a fun and accessible way, helping them discover how technology can become a powerful creative partner.

Class Agenda (4th April 2026)

Time	Session	Description
